
[Rock Wool Board](#)

Rock Wool Board

Our rock wool board is characterized by outstanding thermal resistance, high strength, good sound absorbing, and safety. It can be used for building insulation, marine and offshore insulation, industrial insulation, horticultural substrates and etc. We are able to provide rock wool board in a wide range of densities, from 40 to 200kg/m³.

Parameters of Rock Wool Board

Classification	Nominal Density(kg/m ³)	Dimension		
		Length(mm)	Width(mm)	Thickness(mm)
Rock wool board	40 - 200	1200	600 / 1200	30 - 150

Powered by our technologically know how and our quality production line, we manufacture higher quality products with more excellence and safety features. Our rock wool products consist of rock wool board, rock wool blanket and rock wool pipe section with or without facing or stitching treatments. Our products cover a large range of density and thickness to meet any individual requirements.

Other thermal insulation products also include glass wool products and ceramic fiber products. Please refer to the individual page for more detailed specification.

For detailed inquiry or consultancy, we welcome you to contact us directly.
